

Egremont Board of Health

March 26, 2020, 10:10am

Conference Call

Attending: Charles Ogden, Chairman, Dr. William Rose, Ellen Maggio

Others Attending: Ed Fahey, Alliance Agent/Inspector

Recording: Juliette Haas, Director

- 1) Chairman Ogden opened the conference call meeting at 10:10 am. Acceptance of the minutes from the March 12, 2020 meeting was tabled until the next BOH meeting.
- 2) **Straher/24 Lakeside Drive** The board requested Mr. Straher be sent a letter asking for him to supply a timeline of future plans for the uninhabitable structure on his property. Chairman Ogden requested a draft of the letter first be sent to the board for their input before issuing.
- 3) **Brenner/10 Mt. View Road** The current septic system at this property is not in groundwater, as was stated at the previous meeting. Portions of the four line leach field do not meet adequate separation to groundwater. Director Haas assured the board that a BOH signoff for future construction will not be granted until the matter is resolved. The system will need a bigger septic tank.
- 4) **Walley/5 Prospect Lake Road** An emergency, temporary repair was performed on the septic system at this property. The owners will be sent a letter stating they must upgrade their septic system fully in the near future. In the meantime they must limit their water usage and have their tank pumped often until the new system is installed.
- 5) **COVID19** The board was given a situational report. They discussed local measures that could be implemented to reduce future risk.
- 6) Meeting adjourned at 10:47 am. The next meeting is scheduled for April 9th.
